

Our manufacturing range of Glaze Line Machineries

**Automatic Glaze Tiles
Screen Printing Machine**

**Glaze Line
Arrangement**
(Size : 600, 700 & 800 mm wide)

**Glaze Pump with Tank
"8" Type**
Suitable for high density glaze
(Capacity : 150 Litre)

Fixative Booth

**Single Disc
Spray Booth**

**Double Disc
Spray Booth**

Water Scrapping Device
Suitable for removing excess glaze from tile sides

Dry Scrapping Device

Line Turning Device
For 90 Degree turning of glazing

Automatic Glaze Tiles Printing Machine

This Printing Machine is suitable for high production of double firing wall Tiles. Machines are most popular in various markets and allow high productions in the different sizes, adopting suitable corresponding kit. Machine can be used for double fired tiles at a speed around 80 Pcs. per minute for size upto 200 x 150 and at about 70 Pcs. per minute of 300 x 200 mm.

However this are indicative data
And can change according to
Actual body parameters &
Environmental

Conditions. Chain index drive system assures a perfect synchronisation during the printing phase.

2 Nos. of photocells senses the inflow of tiles & controls printing cycle using highly reliable control circuit, is achieved by A.C. Inverter.

No. of such machines can be placed over Glaze line subsequently for multicolour Decoration over tiles.

**Model No.
AI-10/30 INV**

Technical Specifications :

1500 mm (Width) x 1375 mm (Depth) x 1225 mm (Height)
Maximum Screen Size : 550 mm x 500 mm

Production Speed : Max. Printing Speed / Minute

100 x 100 : 80 Pcs.
150 x 150 : 75 Pcs.
150 x 200 : 75 Pcs.
200 x 300 : 60 Pcs.

Compressed Air Requirement : 2 CFM at 60 PSI

Power Requirement : 1.0 H.P. (0.75 KW) max. 2 phase / 440 Volt

Approx. Weight : 225 Kg.

MANUFACTURER OF : SPECIAL PURPOSE MACHINERY FOR : CERAMIC GLAZED TILE PLANTS
