

POWERING THE FUTURE

Ashirvad *Industries*

Special Purpose Machinery For
Composites Industry / Pultrusion Machines / Sheet Molding Compounding Machine & Equipments

**POWERING
THE FUTURE**

**SMC
MACHINE**

SMC Machine Specifications:

Compound Width	1000, 1200 & 1500 mm
Compound Weight	2.5 - 7.5 Kg/m ²
Glass Content	up to 50% * (Using Double Chopper Head) with Strand length 1/2" – 2"
Electrical Power	9.5 - 12.0 kW. (Connected Load)
Compressed Air	4-6 CFM at 70-80 PSI Pressure
Machine Speed	2 – 10 mtr/min.
Winder	Both Roll winder as well as zig-zeg winder

* Machine with standard operating automation and integrated level of plant automation can be offered with specific requirement.

SMC Machine Features:

- * Precision tubular machine structure with epoxy primer and PU paint
- * Precision machine components with required protective coating
- * Life lubricated gear reduction drives
- * PLC, HMI, AC Drives for machine operation and control
